HYT H2 Alinghi

— After the H4 Alinghi, HYT unveils the H2 Alinghi, featuring a brand new as-cast titanium case.

f For the second year of their partnership, HYT and Alinghi are hoisting the sails still higher with the H2 Alinghi.

t For the first time in its history, HYT has built a case from as-cast titanium. This is also the very first H2 to feature the new black liquid, unveiled at the beginning of the year.

p The exclusive HYT H2's manual winding caliber has been suitably adapted: for the first time, it's been crafted in two-tone black and grey - the bridges are made of black titanium DLC and the bottom plate is rhodium-plated. Above it glides a brand new central minutes hand, drawing inspiration from marinestyle hands.

The new interplay between grey and black gives the watch an appearance that's both technical and elegant, further highlighted by the bezel rider tab, which in another first, sports a rounded shape to accommodate the Alinghi logo, engraved in red varnish.

Lastly, the hour flange has also been redesigned with a twin satin/glass blasted effect, making the hour markers stand out both more clearly and more gently.

The watch is mounted on a new ultra-resistant technical strap, made of dark charcoal grey fabric with a black stitching, and equipped with a titanium deployant buckle.
