

SALONQP HIGHLIGHTS

ONQP TOP 10

ery this week. *Caitlin McDonald and Hannah Silver on what to do, see – and hear*

Whisky, sherry, and ginger in the treatment a tasty result.

1 *Whisky*
It's straightforward and as beautiful. According to

creator Max Bissler: "If you look at the designs of MB&F, you see extreme luxury, you see gloves, you see cars." The latest Horological Machine No. 6, will be on display, launched just 48 hours before. Word is that it's a pretty spectacular piece.

9 **Think outside the box.** HYT watches are water-powered. As the launch of the H3 nears, Vincent Perriard, CEO of HYT, will be at SalonQP to explain why it's taken 3,400 years to overcome the force of gravity and tell the time with liquid.

10 **Go to sound without Jagger.** LeCrabier is a master of the minute repeater - watches that tell the time via a series of chimes. Listening to them at Jagger's Second School will reveal how this works like a little storm for the wrist, with

different alloys giving different sounds. And, if you are lucky enough to own one, you can bring your own minute repeater along to the Second School and have it tested.
