HYT presents H1 Dracula DLC

Sep 03, 2014

Like 0 | Share 0 | Tweet 0

Drawing inspiration from the legendary mythical XIX century vampire and the mystical bloody eclipse of Transylvania, this dangerously spellbinding timepiece transcends with immortal technology while providing an elegant assimilation of the famous literary Count. Dark, robust, and dripping with red accents, the 48.8 mm DLC (Diamond-like Carbon) case boasts brushed, shot-peened and satin-finished surfaces. The time is displayed with the help of retrograde red fluid hours, and also features a regulator, a small seconds' counter, and a power reserve indicator. The H1 Dracula DLC is fitted with a black alligator strap with red stitching and is available in a limited series of 50 pieces.
