### Description

What number of the watches with HYT H1 Watch – Factory Visit and Hands-On for many

So as chances are you'll know My business is a large fanatic with regards to modern horology and alternative time telling methods, so I definitely couldn't avoid writing a short article about one of the best modern brands – HYT. The brand is famous today as the most innovative replica Rolex Sea Dweller companies who really keep pushing the boundaries of time. I prefer to let you know a bit in regards to the watchmakers behind the Hydro Mechanical time in addition to provide several guided tours in the factories.

As any devices, the HYT project started having an idea replica lag heuer Carrera, 11 years the government financial aid 2002, when Lucien Vuillamoz is here program crazy (at the same time) reasoning behind building a liquid wristwatch that will use water to show time. Course at that time there was clearly no understanding of how to do that for the reason that not a soul was persistent enough for getting this project 'flowing' (knowing what I'm saying). Before long Lucien chose to change replica breittling navitimer his concept a bit and rather than a water watch he was now exploring the understanding of having 2 reservoirs and 2 liquids, and since he spend more than twelve months in research and development he finally put together a prototype, he soon protected and used the technology to collaborate using the current CEO of HYT, Vincent Perriard, that has also shared Lucien's vision about liquid time. Lastly, with 'Etude de Style' lab designing this wrist watch, Lucien Vuillamoz supplying the liquid and technology behind it and Jean-Francois Mojon creating the mechanical movement the initial watch is manufactured – the HYT H1.

Because the advance of HYT H1, the wrist watch have been altered inside materials useful for the casing and from now on we've got the whole selection of HYT H1 models beginning titanium, to Black-DLC or Pink Gold (and also bronze). However every one of the watches share one thing in keeping – which is the way time is displayed, and also the movement is shown.
